

SteelBrick Billing

100% NATIVE ON SALESFORCE

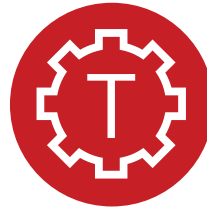

Invoices

Create and send invoices on the go, and configure multiple billing cycles

Payments

Manage and collect payments without processing complications

Taxes

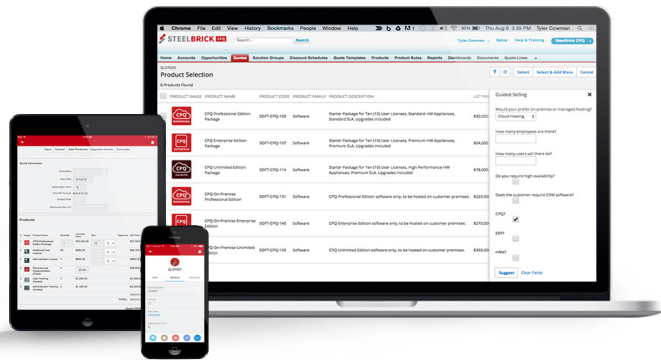

Easily manage taxes (including VAT) and integrate with your accounting system

Revenue

Quickly recognize revenue and report on quotes, orders, invoices and payments

Built and Delivered on Salesforce¹

Automate Billing. Eliminate Errors. Grow Faster.

Manage subscription, one-time, and usage-based billing *anytime, anywhere, on any device.*

With SteelBrick Billing, you can seamlessly integrate your invoicing, collections, taxes, and reporting into one platform, all within Salesforce. In addition, SteelBrick Billing can manage revenue and billing for subscriptions, one-time billing, and usage-based billing scenarios. Save your company time and money while providing a streamlined user experience for your customers.

SteelBrick met our requirements, including some that other vendors couldn't satisfy.

Doug Ramirez

Blue Ridge InternetWorks

Over **\$5 billion** revenue processed annually

Over **60 million** transactions processed monthly

Over **7,000** users worldwide

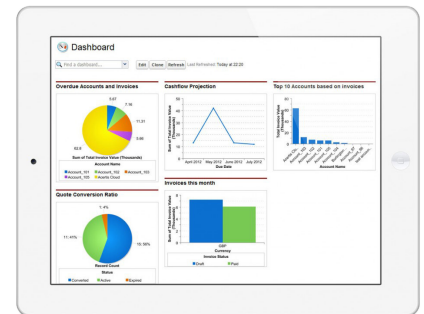

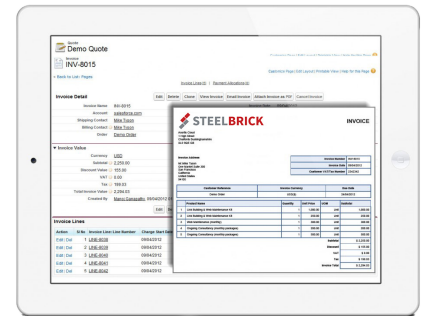

SteelBrick Billing automates billing and collections, all within Salesforce. Manage orders and PO's, generate invoices, manage payments and recognize revenue. SteelBrick Billing is 100% Native on Salesforce and is part of SteelBrick's full Quote-to-Cash solution.

With SteelBrick Billing, you can:

- Automate invoicing, generate invoices in bulk, configure and schedule multiple billing cycles, and automatically reconcile invoices. Integrate with your Accounting or ERP system (Sage, QuickBooks, Workday, SAP). Create high quality, branded invoices.
- Manage and collect payments without processing complications, and manage the dunning process. Easily manage taxes including VAT, configure tax rates by product or customer category, and sell and bill in multiple currencies.
- Quickly recognize revenue and report on quotes, orders, invoices and payments.

With SteelBrick Billing, there's no more manual data input or re-entry into multiple systems, improving speed, accuracy, capacity and ultimately cash flow and profitability. SteelBrick Billing automatically links CRM with ERP and Finance, providing real time reporting and forecasting across your entire business, from lead generation to cash in bank. It's easy to update and amend, fully scalable and secure. Maximize your investment in Salesforce and extend functionality to automate your entire sales ordering and billing process with SteelBrick Billing. It's a perfect companion to SteelBrick CPQ (Configure Price Quote), as part of a full Quote-to-Cash solution.

Eliminate manual data input

No more missed invoices

Spend time more productively

Reduce invoice queries

How We're Different

Out of the Box Quote-to-Cash

- Built for Salesforce customers
- Uses Salesforce interface
